

Amendments to and Listing of the Claims:

Please amend claims 1-6, without prejudice, as shown below in the following listing of all claims ever presented. The following listing of claims replaces all prior versions of the claims.

1. (Currently Amended) A polyamide resin composition for part of an engine cooling water system, comprising 100 parts by weight of a polyamide resin comprising (A) from 50 to 98 % by weight of nylon 66, (B) from 1 to 30 % by weight of an aromatic polyamide resin, and (C) from 1 to 20 % by weight of nylon 12, wherein the percent by weight amounts are based on the total combined weight of components (A), (B) and (C); and (D) from 5 to 150 parts by weight of an inorganic filler, with the total content of nylon 66, the aromatic polyamide resin and nylon 12 being 100 % by weight.

2. (Currently Amended) The polyamide resin composition for part of an engine cooling water system according to claim 1, wherein the aromatic polyamide resin (B) comprises an amorphous copolyamide resin having from 40 to 95 % by mole of a terephthalic acid component unit and from 5 to 60 % by mole of an isophthalic acid component unit and an aliphatic diamine, with the total content of the terephthalic acid component unit and the isophthalic acid component unit being 100 % by mole based on the amorphous copolyamide resin.

3. (Currently Amended) The polyamide resin composition for part of an engine cooling water system according to claim 1, wherein the aromatic polyamide resin (B) comprises an amorphous copolyamide resin having from 99 to 60 % by weight of a polyamide forming component comprising an aliphatic diamine and isophthalic acid and terephthalic acid and from 1 to 40 % by weight of an aliphatic polyamide component, with the total content of the polyamide forming component and the aliphatic polyamide component being 100 % by weight based on the amorphous copolyamide resin.

4. (Currently Amended) The polyamide resin composition for part of an engine cooling water system according to claim 1, wherein the inorganic filler (D) is glass fibers.

5. **(Currently Amended)** The polyamide resin composition for part of an engine cooling water system according to claim 1, wherein the ~~engine is an automobile engine~~ polyamide resin composition has an antifreeze resistance value greater than about 70%.

6. **(Currently Amended)** A part of an engine cooling water system comprising the polyamide resin composition according to claim 1.
